Extremely helpful for all type of folks. It generally is not going to expense a lot of. I found out this book from my dad and i advised this book to find out.

Xlibris. Hardcover. Book Condition: New. Hardcover. 582 pages. Dimensions: 9.0in. x 6.0in. x 1.4in. The noteworthy findings and innovative methods of predicting projectile trajectory, introduced in my books *Exterior Ballistics: A New Approach (EBNA)*, Xlibris, 2010; and *Exterior Ballistics with Applications (EBA3e)*, Xlibris, third edition, December 2011, require a methodical approach and further development. As result, the amateurs and professionals interested in exterior ballistics of firearms, and especially in long-range shooting with small arms, have a new book, *Exterior Ballistics: The Remarkable Methods (EBRM)*, that aims to enrich the foundations of modern exterior ballistics and to lessen the complexity of physics and mathematics techniques in use. *Exterior Ballistics: The Remarkable Methods* is a book that combines and develops further the methods introduced in *EBA3e*, *EBNA*, and in the *Exterior Ballistics of Small Arms (EBSA)*, Xlibris 2009). The foundations of the book are mainly the findings and the innovative ballistics methods presented in *EBA3e* and *EBNA*. The remarkable methods of exterior ballistics presented in this new book include: The methods of determining the function of resistance $G(v)$ of a given bullet (i1) using range tables, or the experimental data measurements of three or four coordinates at the points of projectile impact. The model of Tangent Law of Trajectory Refraction and the related set of formulas that we use to study the trajectories of projectiles in nonstandard atmosphere. Series expansion method and the techniques of (second to sixth order) parabolas we employ to predict with great accuracy the projectile trajectory. The exceptional Siaccis methods that we apply as well for the projectile trajectory in nonstandard atmosphere and in inclined shooting combined with the tangent law of trajectory refraction. It is important to note that using the similarity laws of fluid dynamics we have obtained the tangent law of projectile refraction, which represents a...
