

Molecules Are Everywhere!

By Be Naturally Curious

Be Naturally Curious, United States, 2015. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Has your child ever wondered what things are made of? Designed for grades K-5 and to be done at home or with small groups, this interactive multi-activity mini-course introduces children to the world of molecules and how different types of molecules are all around us. The mini-course includes a richly illustrated story-based lesson as well as games, activities, and projects that appeal to all types of learners. After a fun introduction to molecules through a story about Ellie the Electron and her cousin Sam, children construct their own molecule models using cutouts included in the mini-course. Children then reinforce their understanding of how molecules are formed through an electron match card game. For children who like to move around, a movement-based game then lets them become part of a molecule themselves (along with friends or stuffed animals). Finally, kids get to learn how new molecules are made through chemical reactions in a series of safe and easy experiments they can perform at home. Most materials needed to complete the mini-course can be cut from the book...
