Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1907 Excerpt: . of combustion. The boiler is fitted with pilot tap and self-lighting burners, with a J in. gas supply. There is no risk of an explosion, as the gas cannot be turned on and lighted unless the pilot burner has previously been lighted, since by turning on the gas tap, the pilot light is turned into position as well as closing the opening to prevent a taper being used. Next are good water heaters for rapidly providing hot water for baths and other domestic purposes. These Fig. 99. heaters are not intended to boil the water, but simply to deliver water at a temperature which may be described as scalding hot. That is, one to two gallons of hot water may be delivered per minute at a temperature of from no degs. to 170 degs. Fahr., according to the rate of flow of cold water. The new rapid heater, Fig. 99, has several good features. There is no risk of explosions, and when fitted with a safety water tap the risk of damage by the gas being lighted before the water is turned on is prevented, as the gas and water taps are connected in such a way that it is impossible to light the gas without first turning the water tap on. The water tap should be connected to the low pressure water service. The water passes over a very large heating surface of well-tinned copper, so that only pure water is delivered. No rapid...
