Reviews

This pdf will not be simple to start on reading through but extremely enjoyable to see. I have read and i also am sure that i will planning to read through again once more in the foreseeable future. You wont really feel monotony at whenever you want of the time (that's what catalogues are for relating to if you request me).

Pipe laying was continued to the west to Station 56, and then the derrick was pulled back to Station 5 and pipe laid again to the west as far as Station 21. The average cut from Millburn Engine House to Spring Creek was about 6.9 ft., the maximum being about 15 ft. For a short distance, through the heavy cut south of the Millburn Reservoir, a steam shovel was used between May 16th and 21st, 1901, the actual working time of the shovel being 33J hours. The shovel was then unshipped and replaced by a bucket, and thereafter the upper portion of the excavation was done by scrapers and the lower portion, out to grade, was removed in the bucket, the derrick thus being used both for excavating and pipe laying.
